

Medical Students

As of July 8th, 2008 you will have access to using PowerNote, a tool in Cerner, for documenting your daily inpatient notes. There are certain areas where you will be required to use PowerNotes:

- **Riley Hospital**: Required use in the PICU, Burn Unit and Infant ICU. Optional use in the rest of the hospital.
- **University Hospital**: Required use in the MICU and SICU. Optional use in the rest of the hospital.
- **Methodist Hospital**: Required use in all the Adult ICUs and the PICU. Do *not* use outside of these units.

Please work with your individual teams to decide if you will be using PowerNote on your particular rotation. In order for you to have access to this tool, you will notice that there is a change in your Cerner view when you log on as of June 23rd. Your training materials include instructions on how to navigate this new view called Enhanced View.

Remember: *As of July 8th, you will need to look both in the patient's chart and in Cerner for notes as those using PowerNotes will not be printing out these notes to place in the paper chart.*

You can access training...
